

Speedball Underglazes fire consistently true, and are unmatched in vibrancy and value. Originally formulated to perform in a wide firing range (cone 05-6), these Underglazes have been successfully fired at Cone 10. Suitable for use on greenware or bisque, each color produces a soft, velvety finish when left unglazed, and intensifies in richness when covered with a clear glaze.

Formulated to be a far thicker, concentrated consistency than competitive brands, which allows you to easily adjust using water to the desired workability and extend the amount of product available in every jar, delivering a superior value to your studio. The bold, eye-catching color of these Underglazes won't be compromised, no matter how much you thin the product, making for a happy kiln opening and studio budget!

We offer 20% off the 2oz or Pint prices if you buy 6+ of the same item number and size.
